

## Aerial Work Platform

Aerial Work Platforms - There are numerous accessories utilized for lift trucks that could be utilized so as to help expand the functionality of your forklift and allow you to carry stuff, handle materials with out difficulty or to complete clean-up jobs.

Some accessories were specially designed for the blades themselves. For instance, fork extensions can be utilized if you require much more blade length, which increases lifting capacity. Blade extensions come in lengths varying from 48-120 inches. Rounded or triangular attachments are one more kind used whenever transporting rolled material in order to make sure it does not roll off of the standard flat blades.

Lifting attachments can be pivoting and telescoping crane accessories. They come in numerous styles. These accessories are often utilized for transferring lumber, metal bars, poles or whichever sort of bulky stuff. Other accessories such as different kinds of hook plates and hooks are existing to carry things using a sling or chain. Magnetic lifters and slab lifters are other objects which could be used with hook attachments. Slab lifters are specialized attachments that are used for carrying a variety of materials that are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools that attach to your forklift so as to make transporting rolls of carpet easier. The attachment connects onto the forklift's blades and has a pole that goes through the center of the carpet roll.

There are various kinds of lift truck attachment used for facility maintenance like for instance snow forks. These industrial blades could be attached to front end loaders and meant for transferring materials like for example snow, dirt as well as mulch. Other popular cleanup accessories include magnetic sweepers and standard sweepers. Standard sweepers includes a broom which the lift truck forks hook onto for sweeping large spaces like for instance factory floors, parking lots and warehouse. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in places where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths up to sixty inches and this surface area makes clean up quick and easy.

A material spreader is another lift truck accessory that is usually utilized at facilities. These spreaders are helpful for various applications such as spreading fertilizers, insecticides, seeds, ice melt, rock salt and pellets.

Work platforms are another optional lifting accessory which many companies use on a daily basis. The platforms range in size from 36" x 36" to up to 60" x 60". There are some models existing that are capable of folding up and storing into a smaller space. Work platforms are designed to raise staff up to an overhead location with the use of the lift truck. Larger platform units have additional space for workers to be able to carry tools and other essential stuff intended for the task. Often work platforms are constructed of poly material or steel.
