

JLG Forklift Parts

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove set out on a cross country RV trip. After spending numerous years establishing his family built crane business with his brother, John had no idea that this trip would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road expedition.

Whilst on their trip, John spent time talking to past business acquaintances whom the Groves stopped to visit along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered an infinite marketplace for a product that could quickly and securely lift people in the air to accomplish upkeep and other construction functions.

Upon returning from their travels, John formed a joint venture with two friends and purchased a metal fabrication business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty staff, they created and sold the first JLG aerial work platform. The business incorporates some of the basic design essentials of that original lift into current versions.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the business has extended itself into quite a few global marketplaces and continues to cultivate contemporary machines to ensure that clients are able to become safer and more well-organized within their workplace.
