

## Meritor Part

Meritor Parts - Meritor is a leading international supplier which is proudly established on a 100 year custom of quality and service. They concentrate on several integrated systems, modules and components to original machinery makers and the aftermarket for the industrial and transportation sectors.

Meritor prides itself in the company's unique energy and thinks that this particular energy contributes to their competitive advantage within the international operations. The business values their customers and wishes to ensure their success while anticipating their different requirements. Meritor begins with a culture that values diversity of individuals and their broad thought processes. Operating in 19 nations and hiring more than eleven thousand two hundred individuals, Meritor promotes innovation and collaboration among a team of experienced professionals.

Meritor strongly believes in only hiring future focused individuals. These top-caliber people can rapidly get used to to changing environments and freely demonstrate the level of performance and commitment required to get results for the competitive market environment. The company empowers their teams to make sound business decisions in order to improve the overall success of the company. In return, Meritor offers their workers different chances for professional and personal growth.

Their Advanced Engineering team is at the forefront of parts and system engineering that comprise drivelines, axles, braking and suspension systems meant for heavy duty and medium trucks, off-highway vehicles, buses, military vehicles and trailers. The Meritor Advanced Engineering team is growing. They started a new technical center in Bangalore, India in September 2009 so as to lead their advanced product development initiatives which represent the whole Asia Pacific region. This particular team is even responsible for supporting the requirements of all their global engineering staff.

The Quality team at Meritor is a dynamic and customer-focused group who is devoted to ensuring optimum growth at their aftermarket distribution facilities and production plant which are situated on 5 continents and in 19 nations.

They have their supplier network that is specifically located in order to support the development of the business. Each regional team has globally supported initiatives, quality systems and centralized in Six Sigma and Materials Engineering. Meritor's growing Six Sigma program promotes a fact-based, data-driven method to decision making in each and every part of the company. The DFSS or also referred to as Design for Six Sigma ensures product reliability within each region. The team is also included transactional Green Belts who use Six Sigma tools to business techniques and implement lean techniques.
